$C\:E$ This product conforms to the EMC Directive 89/336/EEC and the Low Voltage Directive 73/23/EEC.

The complete Declaration of Conformity is available from Ohaus Corporation.

Disposal

In conformance with the European Directive 2002/96 EC on Waste Electrical and Electronic Equipment (WEEE) this device may not be disposed of in domestic waste. This also applies to countries outside the EU, per their specific requirements.

Please dispose of this product in accordance with local regulations at the collecting point specified for electrical and electronic equipment.

If you have any questions, please contact the responsible authority or the distributor from which you purchased this device.

Should this device be passed on to other parties (for private or professional use), the content of this regulation must also be related.

Thank you for your contribution to environmental protection.

FCC NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

CANADIAN NOTE:
This class B digital apparatus complies with Canadian ICES-003.

ISO 9001 Registration
In 1994, Ohaus Corporation, USA, was awarded a certificate of registration to ISO 9001 by Bureau Veritus Quality International (BVQI), confirming that the Ohaus quality management system is compliant with the ISO 9001 standard's requirements. On May 15, 2003, Ohaus Corporation, USA, was re-registered to the ISO 9001:2000 standard.

TABLE   OF   CONTENTS

TABLE OF CONTENTS (Cont.)

1. INTRODUCTION

The Scout *Pro* offers parts counting with auto optimization, display hold, totalize, % weighing and specific gravity mode. Models are available with ranges from 120g to 6000g.

Scout *Pro* standard features include:
- Battery or AC operation (AC adapter included)
- Density/Specific Gravity determination (certain models)
- Integral security bracket
- Programmable auto shut-off
- Span calibration masses included on certain models
- Optional USB or RS232 interface available

Safety Precautions
Please follow the safety precautions as listed:

CAUTION:
- Do not operate the balance around corrosive fumes.
- Use only the adapter provided with the balance.
- Do not try to service the Scout *Pro* balance.
- Before plugging in the balance, make sure that the voltage rating of the power adapter and the AC Adapter match.

2. INSTALLATION
Unpacking
Inform your Ohaus dealer if parts are missing.
Your Scout *Pro* package contains:
- Scout *Pro* Balance   • Warranty card   • AC Power Adapter • Platform
- Instruction Manual   • Calibration Masses (on certain models)
- Draft shield (120g Model only) • Specific Gravity Kit (on certain models)
  Store the packaging material for future transport.

Security Bracket

A security bracket is provided at the rear of the balance allowing the balance to be
secured by an optional cable and lock accessory.

Selecting the Location

For best performance, the Scout *Pro* balance should be used in a clean, stable environment. Do not use the balance in environments with excessive drafts, with rapid temperature changes, near magnetic fields or near equipment that generates magnetic fields, or vibrations.

Balances with Level Adjustment

Balances containing leveling feet and a bubble level must be leveled before using. See illustration for correct leveling.

Button Functions

Two switches provide the necessary functions to access a given menu, select a function and to turn it on or off. Functions are listed as follows:

ON/ZERO
Off

PRINT
Unit

ON/ZERO _Off_ Button

Primary Function (ON/ZERO)- Turns on balance. If balance is on, zeros the display.
Secondary Function (Off)- Turns balance off, **OFF** will be displayed after button is held for 3 seconds. In Display Hold or Totalize mode, a long press exits the mode without turning the balance off.
Menu Function- An extended long press (>5 seconds) during power up will cause the balance to enter the Menu mode. A short press is used to accept a setting on a display.

PRINT _Unit_ Button

Primary Function (PRINT)- Sends print command to interface port. If Display Hold or Totalize mode is active, a short press will enter that mode.
Secondary Function (Unit)- Press and hold scrolls through units. Release on desired unit.
Menu Function- Will bypass setting shown on display.

Symbols Used for Operation of the Balance

Symbols are used to simplify the setup and operation of the balance. A description of each symbol follows:

Entering the Menus

There are four main menus in the balance: **.C.A.L., .S.E.T.U.P., .U.N.I.T.S.** and **.E.N.D**.

Start with the balance off and the Lock Switch off (see page 23)**.**

The sequence is shown below.
Accepting / Bypassing an Individual Menu Item

Start with menu item displayed.
Entering the **.S.E.T.U.P.** Menu

The **.S.E.T.U.P**. menu contains Auto-Off, Linearity Calibration, Mode (Display Hold, Totalize, Specific Gravity) and END. Auto-Off can be turned on or off. Display Hold, and Totalize require entering the Mode submenu.

Starting from the **.C.A.L**. menu.

Calibration

Span Calibration

Span calibration uses two calibration points, zero and a specified calibration weight.
Before beginning calibration, make sure the Lock Switch is off. Clear the platform.

NOTE: *Value of calibration mass depends on capacity of balance.* After calibration, the balance returns to the currently selected weigh mode.

Start with the balance OFF.

Applications

Scout Pro applications include: Weighing, Parts Counting, Percent Weighing, Display Hold, Totalize and Specific Gravity.

Weighing

(Place sample on platform)

* 50.00 **g**

(Example 50g)
Weighing with Tare

Taring zeros the container weight. With the balance on, place an empty container on the platform. (Display example indicates a container weight of 23g.)

(Container weight)

* 23.00 **g**

(Place material in container)

* 50.00 **g**

(50g sample)

(Container weight tared)

* 0.00 **g**
NOTE: Removing the container and material from the platform will cause the balance to display the container's weight as a negative number. The tared weight remains until **ON/ZERO _Off_** button is pressed again or the balance is turned off.

(Remove container with material)

* -23.00 **g**

Parts Counting

Parts Counting is _enabled only_ when PC is turned ON in the **.U.N.I.T.** menu. In parts counting mode, there are two modes of parts counting, normal and enhanced. In normal parts counting, the balance determines the quantity based on the average weight of the parts in the original reference quanitity. In the enhanced mode, additional parts can be added to the platform equal to or less than the original number. The additional reference quantity produces a more accurate average part weight.

Exiting Percent Weighing

Press and hold until desired unit is displayed.

| PRINT Unit | ✳ | *0.00* g |

Display-Hold

Display-Hold is *enabled only* when Hold is turned ON in the Mode submenu in the **.S.E.T.U.P.** menu. Display-Hold mode captures and stores the highest stable value. When displayed, the stable icon will blink. **NOTE**: Units cannot be changed when in Display-Hold mode.

Exiting Display Hold

$$HLd.0FF \quad \Rightarrow \quad 10.00 \text{ g}$$

To return to display hold, repeat above procedure.

Totalize

Totalize is *enabled only* when Total is turned ON in the Mode submenu in the **.S.E.T.U.P.** menu. Totalize allows storage of a series of weight measurements. Totalize mode has been initiated when "**t**" and the current unit, i.e. (**g**) is displayed. When totalized weight is shown, the "**t**" indicator will blink. **NOTE**: Units cannot be changed when in Display-Hold mode.

$$0.00 \text{ g} \quad \xrightarrow{\text{PRINT } Unit} \quad tOtAL$$

(Place 1st weight on platform)

$$10.00 \text{ g t}$$

(Example 10g)

$$\xrightarrow{\text{PRINT } Unit} \quad \text{(Total weight shown)} \quad 110.00 \text{ g t}$$

(Remove weight)

$$0.00 \text{ g t}$$

Total weight will remain on the display until weight is removed. The total weight remains in memory. Total is limited to 999999.

Clear/Exit Totalize

Performing this next step will erase all totalized memory.
Specific Gravity (on certain models)

Specific gravity is *enabled only* when SPEC.Gr is turned ON in the Mode submenu in the **.S.E.T.U.P.** menu. The Specific Gravity mode allows calculating the specific gravity of a sample. **SPEC.GR mode must be turned ON before removing platform and installing hook.** Prepare the balance as shown. Remove the balance platform, insert the hook and install the beaker stand. Beaker is not supplied.

The sample is weighed in air suspended from the hook and then weighed in water. The formula is

$$\frac{dry\ wt}{dry\ wt - wet\ wt.}$$

Additional Features

Weigh Below

Scout Pro permits below balance weighing for applications such as specific gravity/ density determination. The balance is normally elevated, supported on all feet and leveled. A fine wire is attached to the built-in hook at the bottom of the balance (see illustration).

4. MAINTENANCE

Cleaning

To ensure proper balance operation, keep the housing and platform clean. If necessary, a cloth dampened with a mild detergent may be used. Check under the platform for debris and remove. Keep calibration masses in a safe dry place. Unplug the AC Adapter when not in use. For long term storage, remove the batteries.

Troubleshooting

SYMPTOM	PROBABLE CAUSE	REMEDY
No display.	1. Power Adapter not connected. 2. Batteries are exhausted.	1. Connect AC Adapter. 2. Replace batteries.
Battery Indicator is flashing.	Batteries are weak.	Replace batteries.
Incorrect weight reading.	1. Balance out of calibration. 2. Balance was not rezeroed before weighing.	1. Calibrate the balance. 2. Press the **ON/ZERO Off** button with no weight on the platform, then weigh item.
Calibration procedures do not work.	Incorrect calibration masses being used.	1. Use correct masses. 2. See error codes note ERR4.
Unable to display weight in a particular weighing unit.	1. Weighing unit not activated in menu. 2. Mode prevents unit change.	1. Use Units menu to set desired units ON. 2. Exit Hold or Totalize mode.
Balance readings unstable.	Balance location may have drafts from air conditioning vents or vibration from other appliances nearby affecting operation.	Either move or shield the balance from external air currents or vibration.
Error code is displayed.	Various internal and external problems	Review error code table and take appropriate action.

Error Codes List

When internal and some external problems occur with the balance, the internal software will display messages as error codes. Explanations are given for possible problems. Try remedies in order indicated.

Error Codes

Err 1   chEct   Invalid checksum data
                    a) Cycle balance ON/OFF,

LIMITED WARRANTY

Ohaus products are warranted against defects in materials and workmanship from the date of delivery through the duration of the warranty period. During the warranty period Ohaus will repair, or, at its option, replace any component(s) that proves to be defective at no charge, provided that the product is returned, freight prepaid, to Ohaus.

This warranty does not apply if the product has been damaged by accident or misuse, exposed to radioactive or corrosive materials, has foreign material penetrating to the inside of the product, or as a result of service or modification by other than Ohaus. In lieu of a properly returned warranty registration card, the warranty period shall begin on the date of shipment to the authorized dealer. No other express or implied warranty is given by Ohaus Corporation. Ohaus Corporation shall not be liable for any consequential damages.

As warranty legislation differs from state to state and country to country, please contact Ohaus or your local Ohaus dealer for further details.
